

Rizwan Khan

Multan, Pakistan | rizwanfordata@gmail.com | +92 301 9292955 | LinkedIn | GitHub | Case Studies

Education

Emerson University, BS in Artificial Intelligence

Sept 2024 – Sept 2028

- GPA: 3.8/4.0
- **Coursework:** Computer Architecture, Data Structures, Discrete Mathematics

Experience

Data Analyst, HashTurn – Pakistan

Dec 2024 – Present

- Built end-to-end ETL pipelines using SQL + Python within a MySQL environment, improving data freshness and reducing manual preprocessing time by 35%
- Designed a medallion-architecture data model (Bronze → Silver → Gold) that increased data reliability and cut downstream reporting issues by 30%.
- Developed and maintained Power BI dashboards presenting KPIs, trends, and operational insights used by cross-functional teams and international stakeholders.
- Delivered insight-driven presentations to global teams, enabling quicker decision-making and improving stakeholder clarity by 20% (based on feedback from PMs).

Projects

Freelance Athlete Performance Tracking Dashboard (Power BI)

[Project Link](#)

- Built a Power BI dashboard for a Fitness Coach to track performance metrics (strength, speed, mobility, heart rate) for 45+ athletes, replacing manual spreadsheet reporting.
- Automated data updates using SharePoint Lists and Power BI Service, reducing 8 hours of manual reporting per week.
- Helped increase client retention by 20% and supported upsells by providing professional, branded performance reports.

SQL Data Warehouse

[Project Link](#)

- Designed a MySQL-based data warehouse consolidating sales, operations, and customer data into a single source of truth.
- Enabled creation of standardized KPIs (revenue, retention, churn, performance metrics), improving analysis speed for decision-makers.

Freelance HR & Analytics Dashboard

[Project Link](#)

- Cleaned, standardized, and transformed messy HR datasets using Power Query with automated refresh logic.
- Built a real-time salary computation dashboard factoring employee city, workdays, and salaries.
- Reduced manual payroll calculation time by 10 hours/week and cut monthly human errors by 25%.

Technologies

Languages: SQL, Python (numpy, pandas, matplotlib), DAX

Analytics: Power BI, Power Query, Excel

Data Engineering: ETL/ELT Pipelines, Medallion Architecture, Data Modeling, Data Cleaning/Pre-processing

Cloud : Azure Data Factory, AWS

Certifications

Coursera: Data Engineering Foundation

Coursera: Database & SQL with Python
