EXPERIENCE

Data Analyst

Dec. 2024 – Mar. 2026

HashTurn

Multan, Pakistan

- Automated the extraction and cleaning of daily sales/operational data using Python (Pandas), reducing manual reporting time by 35% and eliminating repetitive entry tasks
- Developed automated SQL validation pipelines to identify and filter anomalous data entries, significantly reducing reporting errors for senior management
- Designed Power BI dashboards tracking core metrics (e.g. resource utilization and revenue tracking), enabling stakeholders to improve operational response times by 15%

PROJECTS

SQL Data Warehouse | *MySQL, Medallion Architecture*

[Project Link](#)

- Designed a MySQL-based data warehouse using Medallion Architecture consolidating sales, operations, and customer data into a single source of truth
- Enabled creation of standardized KPIs (revenue, retention, churn, performance metrics), improving analysis speed by 50% for decision-makers

Athlete Performance Tracking System | *Paid Project - SharePoint, Power BI Service*

[Client Project](#)

- Built a Power BI-based reporting system for a **US-based** fitness coach to track performance metrics (strength, speed, mobility, heart rate) for **65+ athletes**, replacing manual spreadsheet reporting
- Automated data updates using SharePoint Lists and Power BI Service, reducing **8 hours** of manual reporting per week
- Helped increase client retention by 20% and supported upsells by providing professional, branded performance reports

Inventory Validation System | *Power Automate, AI Builder, Excel*

Company Project

- Saved 10+ hours per week by building a multi-flow Power Automate system for a US-based client
- Fine-tuned AI Builder inside Power Automate to extract inventory records from delivery invoices
- Reduced manual effort by 20% by automating stock position checks, validation, and alert triggers

HR & Analytics Dashboard | *Excel, Power Automate, Power BI*

[Project Link](#)

- Cleaned, standardized, and transformed messy HR datasets using Power Query with automated refresh logic
- Built a real-time salary computation dashboard factoring in employee city, workdays, and salaries
- Reduced manual payroll calculation time by **10 hours/week** and cut monthly human and notification errors by 25%

TECHNICAL SKILLS

Languages: Python, SQL, DAX

Data & BI Tools: Power BI, Excel, Power Query, MySQL, SharePoint

AI & Automation: HuggingFace, LLM Integration, Prompt Engineering, Power Automate

Concepts: Data Warehousing (Medallion Architecture), ETL Pipelines, Data Modeling

EDUCATION

Emerson University

Multan, Pakistan

Bachelor of Science in Artificial Intelligence

2024 – 2028

- CGPA: 3.7/4.0

CERTIFICATIONS

IBM: Data Engineering Foundation Professional Certificate

Coursera: Database and SQL with Python
